Madhukar Misra, MD, FRCP (UK) FACP FASN, ISHD Director of Education

There will be no registration fee for the participants who wish to attend

REGISTER NOW at ishd.org

Available for On-Demand viewing following SHOWCASE.

PURPOSE

The growth of Home Hemodialysis (HHD) continues to remain unacceptably low. The ISHD believes that lack of awareness and proper education in the available HHD devices is a major reason for the slow growth of HHD. Increasing awareness and familiarity with the evolving and patient friendly HHD technology will increase the “comfort factor” of the nephrology community. This ISHD event represents an important step in this direction.

The Virtual SHOWCASE and EXHIBIT HALL will be a one-stop shop for all physicians, fellows, nurses, dialysis technicians, patients, and others with an interest in home hemodialysis. This will be a unique platform for industry to showcase their devices/machines (those currently available and those under development) to a wide audience and interact with ISHD Panelists on various features of their products – providing participants the opportunity to view all the HHD devices side-by-side in a Virtual Showcase.

OBJECTIVES

Increase awareness of available technology in HHD amongst dialysis providers to promote growth of HHD.

Provide a unique online platform to the HHD industry to showcase the latest technology and highlight unique features of HHD devices.

Offer a unique opportunity to the presenters, panelists and the nephrologists/nurses/technicians to interact on various aspects of HHD technology.

ABOUT ISHD AND OUR AUDIENCE

ISHD is a nonprofit membership society with the mission to improve care of ESKD patients; promote hemodialysis education and research; facilitate dissemination of dialysis related knowledge, and be a patient advocate in all dialysis and related matters.
